Meyer "S" Series Blasters have been designed to systematically create a steady flow of material to the spinner. "S" Series Blasters come standard with an on-demand vibrator, a load-bearing baffle plate – that lessens the pressure on the auger, and a multi-spiked auger that reaches deep into the hopper. All of these work together to break up coagulated material creating a constant flow of material to the spinner. This means you get reliable performance in less than perfect conditions
